Omar Lahlou Mimi

Montreal, QC | omarlahmimi@gmail.com | (514) 771-4587 | omarlahloumimi.com

Summary

Computer science student and startup founder with experience in **full-stack development**, **iOS apps** and **AI products**. Founder of a live iOS game and a paid data API, with three internships and **9 hackathon wins**.

Skills

Languages: Python, JavaScript, TypeScript, Swift, Kotlin, Java, C#, HTML/CSS, SQL, Dart, Lua
Frameworks/Tools: SwiftUI, React, Next.js, React Native, Node.js, Flutter, Flask, Supabase, Firebase, PostHog

Education

Concordia University, **Bachelor of Computer Science** January 2027 – Present

John Abbott College, **DEC Computer Science Technology** August 2023 – May 2026

- **Dean's List recipient**

Harvard University, **CS50: Introduction to Computer Science** August 2022 – December 2022

Experience

Startup Founder, **Telora Fellowship** 2026

- Telora Fellow (**1% acceptance rate**), raised **$55K** from the fellowship and built full time for six months in Miami

Software Developer Intern, **CAE** 2026

- Worked on **Windows OS imaging** and **automated validation pipelines**, and fixed a **security bug**

Specialist, **Apple** August 2025 – Present

- Deliver **personalized customer experiences** by matching technical needs to Apple solutions

DevOps Engineer Intern, **CAE** Summer 2025

- Optimized **CI/CD pipelines** using Build Orchestrator, automating **20+ hours of manual work weekly** through intelligent build triggers
- Implemented **automated asset versioning system** ensuring synchronized builds across multiple training simulation products
- Enhanced deployment efficiency by **75%** through streamlined build processes and automated testing integration

Research Assistant Intern, **Institut de tourisme et d'hôtellerie du Québec** Summer 2024

- Developed **Python desktop application** with TKinter for automated government document classification, reducing manual processing time by **80%**
- Built **web scraping solution** analyzing pet policies across **100+ hotels**, saving approximately **40 hours of manual research weekly**

Projects

Prova: Startup Funding Data API

- Built a funding data API covering **265,000+ companies**, using TypeScript, Python and Supabase
- Served **420,000+ lookups** in its first month, including **64,000+ paid lookups**, making **$8K in revenue**

Plotbreak: The Playable Anime

- Shipped a native SwiftUI iOS game with an AI story engine, live on the App Store, built on Postgres, Supabase and PostHog
- Reached **1,000+ accounts**, **9,000+ AI story turns** and **60+ in-app purchases** within 8 weeks of launch
- Hit a peak of **105 DAU**, with **8.3% D7 retention** in our best weekly cohort and **30%** of players reaching turn 10

Awards & Achievements

- **9 Hackathon Wins**, and competed at international hackathons in San Francisco, Vietnam and China
- **3x Winner** - MariHacks 2026 (Best Design, Best Overall Idea, Best Use of ElevenLabs)
- **First Place Winner** - MariHacks 2025, DawsHacks 2025
- **Best Use of ElevenLabs** - JacHacks 2026
- **Security Challenge Winner** - JacHacks 2025
- **Second Place Winner** - Vanier Hacks 2025, Bell GeekFest Hackathon 2023
- **6th Place** - CUSEC 2025 (Canada's largest student software engineering conference)
- **Most Creative Project** - CSSA Personal Project Showcase 2025, Vanier College
- **Mentor** - HackThe6ix 2025 (Toronto's largest summer hackathon)
